Hi all

I would like to kindly ask some compensation for Oct/Nov 2019 support/development tasks

Evo binary compiles for Linux x64 & ARM and MacOS, mainnet and testnet

User support in discord/email/other channels.

Mobile wallet: bug chasing crash in iOS due to SPV receiving corrupt flagLen data.

Other research tasks related to pool, MacOS specific, POBH 2.0, Dash 0.14 codebase merge.

Dealing with several service providers offerings in discord.

In all a capped amount of 2M.

Thank you very much!
